TECHNOLOGY FOR POWER AND LOCOMOTION

Established in 1976, Trade Promoters Limited (TPL) is Sri Lanka's sole authorized distributor for global entities Cummins Inc. (diesel generators and engines for marine, construction and industrial applications), and Schindler (elevators and escalators).

TPL takes pride in its 25-year relationship with Cummins Inc. (USA) – a Fortune 500 company and the largest diesel engine manufacturer in the world.

TPL, supported by its team of experienced engineers and Cummins factory trained technicians, is the market leader in the diesel generator industry in Sri Lanka.

TPL's Head Office, Workshop, Parts Centre, Noise Treatment Area, Test Cell, and Cummins Certified Training Centre are located in Malabe, Sri Lanka.

Our Product Range

TPL offers Cummins Power Generation diesel-generating sets ranging from 15 kVA to 3000 kVA, suitable for either standby/emergency power, continuous or prime power applications. TPL has generators up to 500 kVA available ex-stock.

Cummins engines are used in Sri Lanka for railways, patrol boats and passenger transport craft, for transfer cranes and trucks at the port, for construction equipment and buses, and on Cummins Power Generation (CPG) generators used all over the island.

Cummins Power Generation matches the right generator set, transfer and control technologies to power a client's needs. With pre-integrated onsite power systems, all the components are designed to work together as a whole. Especially when you need generator power 24 hours a day, it is important to pick a product known for its reliability and long life. Cummins Power Generation generators are known to run almost twice the number of hours, i.e. time before overhaul, compared to most of its competitors.

Diesel-powered generator sets

“

Cummins Power Generation generators are known to run almost twice the number of hours, that is, time before overhaul, compared to most of its competitors.

- Rohan M. Fernando, Chairman, TPL

Engineering Solutions

TPL takes pride in its experienced workforce with integrated professional and technical skills to service client needs; taking its customers from the initial load survey to installation, servicing and maintenance.

The organization provides local value addition by way of sound attenuation, supply of Automatic Transfer Switches and other control gear. TPL has an ongoing commitment in the pursuit of improvements in system performance, focusing on minimising the risk of downtime for its customers.

Propulsion Engines & Marine Generating Sets

Cummins marine propulsion from 120 BHP to 4200 BHP, and marine generating sets & auxiliary power solutions from 78 kW to 3000 kW, are designed specifically for the challenges of commercial marine applications. TPL also offers a line of marine diesel generators from Cummins Onan in the range of 4 kW to 99 kW.

Factory trained marine application engineers, known for their technical expertise and quality service, are available on-call 24/7 to help keep your engines up and running.

Why choose us?

- 1 Strong marine support team including Project Manager, Application Engineers & Drawing Office
- 2 Preferred supplier for Colombo Dockyard in the past 5 years for supply of main engines and aux units
- 3 Factory trained technical staff
- 4 Cummins-certified training centre located in Malabe
- 5 In-house fuel pump and injector repair facility

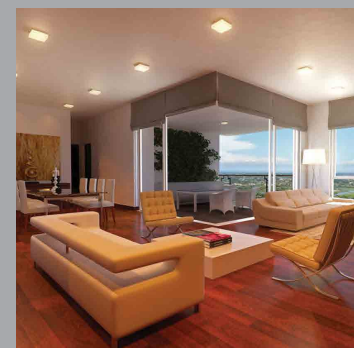

Trained Marine Application Engineers are available on-call 24/7 to assist you

Our Projects

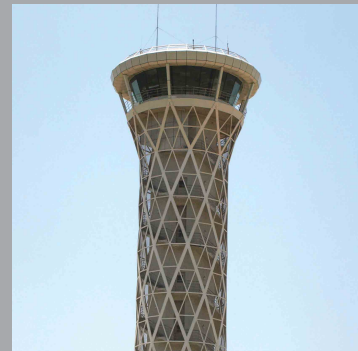

With over 185 staff, the company has grown steadily and expanded its capabilities to contribute to the development of Sri Lanka's infrastructure, its buildings, and its manufacturing capability.

TPL has supplied Cummins Power Generation power solutions for several important projects across various segments.

TPL also supplies diesel generators and associated switchgear, and implements sound attenuation for several overseas projects every year, particularly in the Maldives.

Dependable Service

TPL carries out regular maintenance on diesel engines and generators under its service contracts.

Service agreements with 24 hour coverage

Fully equipped workshop in Malabe contains up-to-date Cummins diesel engine repair tooling for specialized repairs and major overhauls, electronic hardware and diagnostic software

Fully certified fuel pump and injector calibration facility to repair Cummins fuel injectors and fuel pumps

Fleet of field service vehicles including lifting equipment and transport vehicles, effectively minimizes downtime for its customers

Cummins Certified Training Facility

TPL houses a Cummins certified training facility to train its employees with the latest tools and training aids including training engines, simulators, control panels and diagnostic tools. Customised training programs certified by Cummins are also provided to customers.

Spare Parts & Warranty

TPL services are backed by:

- 1 Genuine Cummins spares
- 2 Genuine Cummins Recon spares
- 3 Cummins Filtration products
- 4 Genuine parts warranty

“

We are the only company authorized to carry out warranty repairs on Cummins powered products operating in Sri Lanka.

- Ranil H. Fernando, Joint Managing Director, TPL

TPL is the only company in Sri Lanka stocking genuine Cummins spare parts for an extensive range of Cummins models and the full range of Fleetguard filtration products at its parts warehouse. All genuine parts supplied by TPL are backed by the Cummins warranty.
